

《此时此地》 Codex Master Spec V1.0

One Product. One Path. One Source of Truth.

0. Product Goal

Build a calm, emotionally resonant application where users preserve meaningful life moments through poetry.

This is **not** a social network.

This is **not** a productivity tool.

This is **not** a poetry encyclopedia.

The core experience is:

Encounter → Pause → Leave → Revisit.

1. Tech Stack

Required:

- React
- TypeScript
- Vite or Next.js
- Tailwind CSS (or clean CSS modules)
- Zustand
- Framer Motion (minimal use)

MVP:

- localStorage only
 - No backend required
 - No login required
-

2. Core Domain Model

PathMoment

The fundamental unit of the product.

```
PathMoment
-----
id
createdAt
poemId
userNote
photoUri (optional)
location (optional)
emotion (optional)
visibility
```

UI may render this as a flower.

Internally it is always a life moment.

Poem

Immutable curated content.

```
Poem
-----
id
title
author
dynasty
content
summary
themes[]
seasons[]
locations[]
```

UserPreference

```
theme
language
notificationEnabled
preferredMode
```

3. Routing

/

Home

/path

Path of Life

/poem/:id

Poem Detail

/create

Leave This Moment

/settings

User Settings

No more routes in MVP.

4. Home Screen

Contains only:

- Greeting
- Today's Encounter
- Four entry cards
- Soft background animation

Never include:

- Feed
 - Trending
 - Rankings
 - Ads
-

5. Four Entry Cards

此时

此地

此情

此景

All of them eventually navigate to Poem Detail.

Do not build four independent systems.

6. Save Flow

Poem

↓

Optional note

↓

Save

↓

Append PathMoment

↓

Return to Path

No gamification.

No reward popup.

No confetti.

7. Path Screen

Render PathMoments chronologically.

Use a vertical flowing layout.

Not grid.

Not masonry.

Not social feed.

User should feel like walking.

8. Animation Rules

Allowed:

- Fade
- Gentle translate
- Breathing
- Slow scale
- Wind movement

Forbidden:

- Bounce
 - Shake
 - Flash
 - Explosive particles
 - Fast spinning
-

9. AI Rules

AI must never replace user memory.

AI can:

- Recommend poems
- Suggest wording
- Generate annual summaries

AI cannot:

- Fabricate emotions
 - Auto-create memories
 - Dominate the interface
-

10. Performance Budget

Initial render < 1 second.

60 FPS animations.

Prefer static assets over heavy runtime effects.

11. Accessibility

Readable typography.

Dark mode by default.

High contrast optional.

Support screen readers where practical.

Animation should respect reduced-motion preferences.

12. Offline Behaviour

Everything in MVP works offline:

- Read poems
- Save moments
- Browse path

Cloud sync is optional future work.

13. Logging

Never log:

- User notes
- Sensitive locations
- Personal reflections

Privacy is a product feature.

14. Testing Checklist

Before release verify:

- ✓ Create a moment
- ✓ Close app
- ✓ Reopen app
- ✓ Moment persists
- ✓ Revisit experience feels emotional

If emotional experience fails,

consider it a product bug.

15. NEVER BUILD

Infinite feed

Gamification

XP

Coins

Daily missions

Forced sharing

Pop-up growth hacks

Attention traps

Any feature that pressures users to engage.

16. Engineering North Star

Every commit should answer:

"Does this make the path feel more human?"

If not,

reconsider the implementation.
